

COBBLESTONE

One of the most desired neighborhoods in Carolina Colours has always been Cobblestone. The combination of high-quality construction, functional open floor plans emphasizing indoor/outdoor connections, low maintenance yards and abundant walk-in storage makes living in one of these homes a luxurious experience. Now is the first time in years that three of these homes are on the market—two of them are 3-bedroom homes with many customized, upgraded features and the other is a newly constructed 2-bedroom version. Carolina Colours is the premier planned development in the central coastal region of North Carolina and Cobblestone provides the combination of livability and luxury that fits perfectly into the community life-style.
